## **Changes to the Board of Directors**

At the Annual General Meeting on 19 March 2026, all Board members will stand for re-election, except the current Chairman, Calvin Grieder, and Board member Tom Knutzen.

We would like to extend our heartfelt appreciation to Calvin Grieder for his exceptional leadership and guidance, as a Chairman and member of the Board of Directors, through a period of significant transformation and growth for the company.

We also express our sincere gratitude to Tom Knutzen for his significant contributions and dedicated service to the Board since his first election in 2022.

In August 2025, Givaudan announced the succession plans for the CEO and Chairman. Calvin Grieder, who was first elected to the Board in 2014 and has served as Chairman since 2017, will step down from the Board at the 2026 Annual General Meeting after completing 12 years of service. His tenure has been marked by a strong commitment to enhancing Givaudan's strategic vision and by significant achievements.

Gilles Andrier, who will retire in March 2026 after 21 years as Chief Executive Officer of Givaudan, will be proposed for election as the new Chairman of the Board. Christian Stammkoetter, until recently President Asia, Middle East & Africa at Danone, has been designated as Chief Executive Officer, effective 1 March 2026. Furthermore, should Gilles Andrier be elected as Chairman, the Board of Directors intends to establish the role of Lead Independent Director ('LID') and appoint Sophie Gaspernert as LID to further strengthen the Board's independent oversight and governance.

In addition, the Board will propose the election of Ester Baiget, President and CEO of Novonesis as a new member to join the Board of Directors. Ester Baiget brings significant experience in industrial biotechnology, business transformation, and sustainable innovation leadership, which further complements the Board members' diverse expertise.

All Board members will be elected for a term of office ending at the Annual General Meeting in 2027.
