## Type of service

China and Algeria have a call centre format. All other countries have a Automated Message Service.

## Company code

Please note that the Company access code for China and Algeria is different from the other countries.

- China and Algeria : 8042
- All other countries: 9001

## Dialling format

- Some of the above listed numbers may be accessible by excluding the country code. Please try both options (with and without country code). Refer to the Dialling format column.
- In case of challenge in accessing the phone reporting number, you may flag the challenge to the Group Compliance team (global.compliance@givaudan.com")

## **Reachability**

- ITFN: Toll-free number
- GEO International: like a normal landline number. Example: if calls to the German landline network are included in your mobile phone contract, you would not incur any costs when you call the German number.
- International: reachable internationally
- National: reachably only from within one country
